

“I’m interested in learning more about The Credit Clinic – What’s it all about”?

The Credit Clinic is a full service Credit Analysis and Credit Restoration Firm. Basically, we fix or “repair” people’s credit and get them back on the path of financial freedom.

The Credit Clinic as a company has just recently opened to the public. The parent company was established over five years ago with the founder of the clinic having sixteen years in credit analysis experience. Originally, the services were offered only to private mortgage clients who needed a boost in their credit scores in order to qualify for the loan. However, due to the failing economy and the tightening of credit standards, we recognized the need for an honest, ethical and experienced entity that consumers could go to and get their credit restored.

“How does it all work and how do we get paid”?

You will be an Independent Contractor and building your own business. In a nut shell, you will be selling The Credit Clinic’s services and more importantly, selling yourself! The sell is extremely easy and requires a soft approach – It basically sells itself. An estimated 83% of everyone you come into contact with will have bad credit and will need our services. That means that in the Phoenix Metro area alone, 3,735,000 people will be in your target audience.

Our service costs consumers only \$179 and \$99 (starting month 2) for each month we work on the file with nothing more for them to buy or do. As compensation for selling the product, you will receive \$149 for every paid file you bring in. With our average part time employee selling 30 per month, your commission check would be \$4,470. Your only responsibility is to honestly and ethically sell our service then turn in the file and get paid. You will be supplied with a template of all marketing material but reproduction will be at your own cost.

So . . . if you are ready to make a difference in people’s lives including your own. If you are ready to begin a new full or part time career in an exploding industry, then apply today!!!
